Sum of Weighting of Group B		
Sum of Total Weighting		100%

3.3.2 Rating and ranking of tenders

The weighted score of each criterion will be derived from the product of the sub-weighted factor on its score, and the aggregate bid score will be derived from the sum of the weighted scores of all criteria. For the final ranking the following formula will be applied:

$$\{\text{Quality of project } \Lambda_i = 100 * [70\% (A_i/A_{max}) + 30\% (P_{min}/P_i)]$$

Where:

A_i: the overall ranking of the economic tender i

A_{max}: the overall ranking of the best technical tender

P_{min}: the overall comparative cost of the tender with the lowest price

P_i: the overall comparative cost of the tender i

Λ_i which is rounded to two (2) decimal units.

The most economically advantageous tender is the one that will achieve the highest Λ. Bids with the same overall final score between two or more bidders are considered equivalent. In this case, the award is made to the tender with the highest technical tender score.
